

PBT-200

A quick, simple and cost effective testing solution

A great choice for the professional auto electrician or mobile tradesperson, the PBT-200 delivers a cost effective, simple and portable battery testing solution. Incorporating all of the benefits of OEM testing technology the PBT-200 provides a fast accurate test decision in seconds without the need for user interpretation.

Ideal for in vehicle or bench top testing, the PBT-200 displays test results via 3 LED battery condition indicators eliminating any guess work, and includes bed cell detection, a voltmeter function plus starter and charging system testing capabilities.

Midtronics battery testers are recognised worldwide as the standard for determining battery condition. The patented conductance technology is the preferred test method for battery warranty decisions for automotive dealerships and vehicle manufacturers around the world.

Description	PBT-200 Automotive Tester
Part Number	23972
Products Tested	Automotive & Marine
Testing Functions	12V, 12V charging & starter systems
Battery Technology	Regular Flooded
Battery Rating	CCA, SAE, EN, DIN, IEC
CCA Range	200-850
Warranty	12 months

Test Results Given

Green - Good Battery

Green & Yellow - Fully Charge & Return to Service

Yellow - Charge and Re-test

Red - Replace Battery
