

FBT-50

Ideal tool for powersports vehicle technicians

CONFIGURED
using Yuasa battery
models for added
convenience!

The FBT-50 provides a simple fast and safe testing solution for powersports batteries.

Suitable for use on 12V powersports batteries, the FBT-50 delivers test results in seconds for on the spot decisions regarding state of health and charge conditions. Test results are displayed via 3 LED battery condition indicators, eliminating the need for interpretation and includes bad cell detection, a voltmeter function for starter and charging system testing capability.

For extra convenience and ease of use the FBT-50 is configured using Yuasa model reference numbers eliminating the need for CCA input.

Midtronics battery testers are recognised worldwide as the standard for determining battery condition. The patented conductance technology is the preferred test method for battery warranty decisions for dealerships and manufacturers around the world.

Description	FBT-50 PowersportsTester
Part Number	23971
Products Tested	Motorcycle, ATV's, Personal watercraft, Snow mobiles, Utility vehicles
Testing Functions	12V, starter & charging system output.
Battery Technology	Flooded, VRLA, AGM
Battery Rating	CCA, Ah
CCA Range	10-500 / 2.3 – 30Ah
Warranty	12 months

Test Results Given

Green - Good Battery

Green & Yellow - Fully Charge & Return to Service

Yellow - Charge and Re-test

Red - Replace Battery
