DUAL FORCE+
MULTI-PURPOSE AGM BATTERY
STARTING & CYCLING
DUAL FORCE+

Suitable for use in both starting and cycling applications, Dual Force+ is a multi-purpose AGM battery designed and built specifically for use in a diverse range of applications where dependable starting power and cycling power is a must.

Unlike many competitor AGM products, Century’s new Dual Force+ is manufactured using advanced AGM technology and a specialist hard wearing Polypropylene case which makes it ideal for use in under bonnet applications where heat, fluids and other contaminants can damage products not built to the same specification.

The product is supplied with twin terminals, a dual warranty and an array of advanced design features to ensure long lasting dependable power in a range of applications:

- 4x4 and light commercial starting systems
- Marine starting and dual battery systems
- Caravan, RV & recreational camping applications
- Situations where dependable deep cycle power is required

---

### ABSORBED GLASS MAT (AGM) TECHNOLOGY

Century Dual Force+ batteries utilise absorbed glass mat technology which suspends liquid electrolyte within highly porous glass fibre mat separators. These separators act as a sponge like material, absorbing the loose electrolyte, eliminating acid leaks and spills whilst delivering superior vibration resistance. The maintenance free design avoids the need for regular topping up of electrolyte levels and enables fitment in hard to reach locations without the need for regular accessibility.

---

NOTE: Fitting batteries adjacent to a direct heat source such as turbo chargers may lead to shortened battery life.
ADVANCED AGM TECHNOLOGY

CENTURY’S DUAL FORCE+ IS A TRUE ALL-ROUNDER BATTERY INCORPORATING ADVANCED DESIGN FEATURES AND SPECIALIST INTERNAL COMPONENTS TO DELIVER SUPERIOR STARTING AND CYCLING PERFORMANCE.

ADVANCED AGM SEPARATOR
- High porosity envelope AGM separator improves electrolyte dispersion for increased cycle life and vibration resistance.

X-FRAME ROUNDED EDGE GRID
- Improves strength, reduces grid growth, prevents short circuit & separator puncture.

WAVE STRUCTURE
- Helps prevent shedding of active materials.

SPECIALIST SAFETY VALVES
- Release excessive pressure & gasses from overcharging.

MAINTENANCE FREE, NON-SPILLABLE DESIGN*
- Spill proof design enables multi-angle fitment in hard to reach locations.

REINFORCED POLYPROPYLENE CASE
- Suitable for under bonnet use.
- Vibration & impact resistant.
- Assists with heat dispersion.

HIGH DENSITY ACTIVE PASTE
- Added carbon improves cycling & overall life.

THICKER PLATES
- 20% thicker plates enhances life, durability and cycling capability.

*Ensure cables are clean & tight. Not suitable for inverted use.
MULTI-ANGLE FITMENT

The advanced AGM technology and heat sealed double lid provides a spill proof design, enabling multi-angled fitments* and safe for use in cabins or other hard to reach locations.

*Not suitable for inverted use.

CHARGING & TESTING

The Dual Force+ can be tested using DHC or Midtronics testing equipment available from Century Batteries and selecting the AGM option in battery technology.

The Century CC1206 and CC1212 battery chargers are ideal for charging the Dual Force+.

WARRANTY

The Century Dual Force+ is supplied with a dual warranty for both starting and cycling applications as per the following conditions:

Private Use: Starting 24 months / Deep Cycle 12 months
Commercial Use: Starting 12 months / Deep Cycle 6 months

Warranty void for Taxi use and in vehicle fitted with ISS systems.
