Nationwide Warranty

Each Century battery is supplied with a warranty against defects for the period and application, as detailed on the battery. Call 1300 361 161 for your nearest warranty claim location.

THIS WARRANTY DOES NOT COVER:

- ✗ A flat battery
- ✗ Normal wear and tear
- ✗ Physical damage
- ✗ Undercharging (sulphation)
- ✗ Incorrect application
- ✗ Negligence (before or during use)
- ✗ Overcharging
- ✗ Modifications to the battery

Battery Charging

Recharge the battery using a suitable charger with a current equal to 10~20% of the batteries Ah rating, ensuring AGM battery type is selected on the charger. The battery can be recharged by constant voltage, limited current charging.

12V BATTERY

Constant voltage 14.4V~15V for cyclic charging; 13.5V~13.8V for float charging.

6V BATTERY

Constant voltage 7.2V ~7.5V for cyclic charging; 6.75V~6.9V for float charging.

Battery Care & Maintenance

Regular testing and inspection will help to maximise the life of the battery. A routine inspection of at least once a month is recommended to maintain optimum performance.

USE THE FOLLOWING STEPS AS A GUIDE:

- 1 Make sure the battery is always fully charged.
- 2 Ensure the battery top is clean, dry, and free of dirt and grime. A dirty battery can discharge across the grime on top of the battery casing.
- 3 Inspect battery terminals, screws, clamps and cables for breakage, damage, or loose connections. They should be tight, clean and free of corrosion.
- 4 Clean terminals, clamps, and connectors as necessary using a grease cutting solution.
- 5 Inspect case for obvious signs of physical damage or warpage. This usually indicates the battery has overheated or been overcharged.
- 6 For batteries used in seasonal applications and stored long term, fully recharge the battery prior to storing.

Battery Recycling

98% of a lead-acid battery can be reclaimed through recycling. Make a positive change and recycle your battery responsibly. Scan here to learn more and find your nearest recycling centre or visit recyclemybattery.com.au

MULTI-PURPOSE VRLA RECHARGEABLE BATTERIES FOR DEPENDABLE BACK-UP & PRIMARY POWER

Stationary Power

Century PS 5-year VRLA batteries are a range of high-performance multi-purpose batteries which provide dependable primary and back-up power in domestic and commercial applications.

Manufactured to the latest international standards using some of the highest quality materials and internal components, Century PS batteries provide reliable, trouble free power in applications demanding high service life.

Primary Power Use

Suitable for use in applications requiring constant power over extended periods of time. The advanced design features and specialist construction makes Century PS batteries perfect as the main power source for a range of applications including:

- ✓ Marine equipment
- ✓ Electronic test equipment
- ✓ Television & video recorders
- ✓ Powered ride-on toys
- ✓ Portable lighting
- ✓ Power tools

Back-up Power Use

Provides dependable reserve power to operate critical systems in the event of mains power failure. In such situations these specialist batteries remain on charge until a mains power outage, where they engage providing power to critical systems. Typical back-up power applications include:

- ✓ Communications & broadband equipment
- ✓ Automated doors & security gates
- ✓ Alarm & security systems
- ✓ Medical equipment*
- ✓ Fire systems
- ✓ Computer servers
- ✓ Emergency lighting systems
- ✓ Vending machines

*Please refer to machine manufacturer's specifications for suitability.

Superior Design & Construction

Century PS batteries incorporate Absorbed Glass Mat (AGM) technology which suspends the liquid electrolyte within highly porous glass fibre mat separators. These act as a sponge like material absorbing the loose electrolyte, eliminating accidental leaks or spills.

The Valve Regulated Lead Acid (VRLA) recombinant design eliminates the need for regular maintenance and enables fitment in hard to reach locations without the loss of performance, capacity or cycle life.

- ✓ **High Discharge Rates**
Low internal resistance allows discharge currents up to 10 times rated capacity
- ✓ **Easy Handling**
Leak-proof construction avoids need for special handling and transportation requirements
- ✓ **Design Flexibility**
Can be used in series and/or parallel to service a range of voltage and capacity requirements
- ✓ **Rugged Construction**
High-impact resistant battery casing provides superior resistance to vibration, shock and heat
- ✓ **Valve Regulated / Maintenance Free**
Gasses are recombined within cells, eliminating the need for topping up of electrolyte levels
- ✓ **Longer Shelf Life**
Low self discharge rates permit longer storage and shelf life
- ✓ **Compact**
High grade materials, state of the art designs and specialist plate construction delivers high energy density and superior power to weight ratios
- ✓ **High Charge Acceptance**
Enables quicker recharge for less downtime
